September 7, 2012

Mr. Cecil Edirisinghe,

I am writing this letter of recommendation in regards to the 400 HP AC motor provided to Fairfield by Velicon Motors. The motor is used as a regenerative dynamometer on one of our new product development test stands. The stand is used for dynamic durability testing of various planetary and parallel shaft gearboxes. The motor has worked without problems since being installed in 2007 despite being in nearly continuous operation. The performance of the test stand as a whole has met and even exceeded our expectations. When a need arises for an upgrade to one of our other dynamometers in the future we will certainly consider Velicon as a supplier.

Respectfully,

Justin Dougherty  
Sr. Test Engineer  
Fairfield Manufacturing
